14. Managing anaphylaxis
15. Monitoring and review

Appendix

- a. Allergy declaration form

Statement of intent

Broadbent Fold Primary School and Nursery strives to ensure the safety and wellbeing of all members of the school community. For this reason, this policy is to be adhered to by all members of staff, parents and children, with the intention of minimising the risk of anaphylaxis occurring whilst at school.

In order to effectively implement this policy and ensure the necessary control measures are in place, parents are responsible for working alongside the school in identifying allergens and potential risks, in order to ensure the health and safety of their child.

The school does not guarantee a completely allergen-free environment; however, this policy will be utilised to minimise the risk of exposure to allergens, encourage self-responsibility, and plan for an effective response to possible emergencies.

1. Legal framework

This policy has due regard to all relevant legislation and guidance including, but not limited to, the following:

- Children and Families Act 2014
- The Human Medicines (Amendment) Regulations 2017
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law)
- Department of Health (2017) 'Guidance on the use of adrenaline auto-injectors in schools'
- DfE (2015) 'Supporting children at school with medical conditions'
- DfE (2022) 'Allergy guidance for schools'

This policy will be implemented in conjunction with the following school policies and documents:

- Health and Safety Policy
- Whole-School Food Policy
- Administering Medication Policy
- Supporting Children with Medical Conditions Policy
- Educational Visits and School Trips Policy
- Allergen and Anaphylaxis Risk Assessment

2. Definitions

For the purpose of this policy:

Allergy – is a condition in which the body has an exaggerated response to a substance. This is also known as hypersensitivity.

Allergen – is a normally harmless substance that triggers an allergic reaction for a susceptible person.

Allergic reaction – is the body's reaction to an allergen and can be identified by, but not limited to, the following symptoms:

- Hives
- Generalised flushing of the skin
- Itching and tingling of the skin
- Tingling in and around the mouth
- Burning sensation in the mouth
- Swelling of the throat, mouth or face
- Feeling wheezy
- Abdominal pain
- Rising anxiety
- Nausea and vomiting
- Alterations in heart rate
- Feeling of weakness

Anaphylaxis – is also referred to as anaphylactic shock, which is a sudden, severe and potentially life-threatening allergic reaction. This kind of reaction may include the following symptoms:

- Persistent cough
- Throat tightness
- Change in voice, e.g. hoarse or croaky sounds
- Wheeze (whistling noise due to a narrowed airway)
- Difficulty swallowing/speaking
- Swollen tongue
- Difficult or noisy breathing
- Chest tightness
- Feeling dizzy or faint
- Suddenly becoming sleepy, unconscious or collapsing
- For infants and younger children, becoming pale or floppy

3. Roles and responsibilities

The governing body is responsible for:

- Ensuring policies, plans, and procedures are in place to support children with allergies and who are at risk of anaphylaxis and that these arrangements are sufficient to meet statutory responsibilities and minimise risks.
- Ensuring school's approach to allergies and anaphylaxis focusses on, and accounts for, the needs of each individual child.
- Ensuring staff are properly trained to provide the support that children need, and that they receive allergy and anaphylaxis training at least annually.
- Monitoring the effectiveness of this policy and reviewing it on an **annual** basis, and after any incident where a child experiences an allergic reaction.

The headteacher is responsible for:

- The development, implementation and monitoring of this policy and related policies.
- Ensuring that parents are informed of their responsibilities in relation to their child's allergies.
- Ensuring all relevant risk assessments, e.g. food preparation, have been carried out and controls to mitigate risks are implemented.
- Ensure all designated first aiders are trained in the use of adrenaline auto-injectors (AAIs) and the management of anaphylaxis.
- Ensuring that all staff members are provided with information regarding allergic reactions and anaphylaxis, including the necessary precautions and how to respond.
- Ensuring that catering staff are aware of children's allergies and act in accordance with the school's policies regarding food and hygiene, including this policy.

All staff members are responsible for:

- Attending relevant training regarding allergens and anaphylaxis.
- Being familiar with and implementing children's individual healthcare plans (IHPs) as appropriate.
- Responding immediately and appropriately in the event of a medical emergency.
- Reinforcing effective hygiene practices, including those in relation to the management of food.
- Monitoring all food supplied to children by both the school and parents.
- Ensuring that children do not share food and drink in order to prevent accidental contact with an allergen.

The catering manager is responsible for:

- Monitoring the food allergen log and allergen tracking information for completeness.
- Reporting any non-conforming food labelling to the supplier, where necessary.
- Ensuring the practices of kitchen staff comply with food allergen labelling laws and that training is regularly reviewed and updated.
- Recording incidents of non-conformity, either in allergen labelling, use of ingredients or safe staff practice, in an allergen incident log.
- Acting on entries to the allergen incident log and ensuring the risks of recurrence are minimised.

Kitchen staff are responsible for:

- Ensuring they are fully aware of the rules surrounding allergens, the processes for food preparation in line with this policy, and the processes for identifying children with specific dietary requirements.
- Ensuring they are fully aware of whether each item of food served contains any of the main 14 allergens, as is a legal obligation, and making sure this information is readily available for those who may need it.
- Ensuring that the required food labelling is complete, correct, clearly legible, and is either printed on the food packaging or attached via a secure label.
- Reporting to the kitchen manager if food labelling fails to comply with the law.

All parents are responsible for:

- Notifying the school of their child's allergens, the nature of the allergic reaction, what medication to administer, specified control measures and what can be done to prevent the occurrence of an allergic reaction.
- Keeping the school up-to-date with their child's medical information.
- Providing written consent for the use of a spare AAI.
- Providing the school with written medical documentation, including instructions for administering medication as directed by the child's doctor.
- Raising any concerns, they may have about the management of their child's allergies with the classroom teacher.

All children are responsible for:

- Ensuring that they do not exchange food with other children.
- Avoiding food which they know they are allergic to, as well as any food with unknown ingredients.
- Notifying a member of staff immediately in the event they believe they are having an allergic reaction, even if the cause is unknown, or have come into contact with an allergen.

4. Food allergies

Parents will provide school with a written list of any foods that their child may have an adverse reaction to, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

Information regarding all children's food allergies will be collated, indicating whether they consume a school dinner or a packed lunch, and this will be passed on to the school's catering service.

When making changes to menus or substituting food products, the school will ensure that children's special dietary needs continue to be met by:

- Checking any product changes with all food suppliers
- Asking caterers to read labels and product information before use
- Using the Food Standards Agency's allergen matrix to list the ingredients in all meals.
- Ensuring allergen ingredients remain identifiable.

Kitchen staff have a full list of allergens and will avoid using them within the menu where possible.

Where meals include allergens or traces of allergens, staff will use clear and fully visible labels, in line with this policy, to denote the allergens of which consumers should be aware.

The school will ensure that there are always dairy and gluten-free options available for children with allergies and intolerances.

All food tables will be disinfected before and after being used. Cleaning fluid will be used.

Boards and knives used for fruit and vegetables are a different colour to other knives in the kitchen and aid as a reminder to kitchen staff to keep separate.

Any sponges or cloths that are used for cleaning are colour-coded according to the areas that they are used to clean, e.g. a red sponge for an area which has been used for raw meat, to prevent cross-contamination.

There is a set of kitchen utensils that are only for use with the food and drink of the children at risk. If needed there will also be a set of kitchen utensils with a designated colour. These utensils will be used only for food items that contain bread and wheat related products. Food items containing bread and wheat are stored separately.

Catering staff are responsible for ensuring that the school's policies are adhered to at all times, including those in relation to the preparation of food, taking into account any allergens.

Learning activities which involve the use of food, such as food technology lessons, will be planned in accordance with children's IHPs, taking into account any known allergies of the children involved.

5. Food allergen labelling

The school will adhere to allergen labelling rules for pre-packed food goods, in line with the Food Information (Amendment) (England) Regulations 2019, also known as Natasha's Law.

The school will ensure that all food is labelled accurately, that food is never labelled as being 'free from' an ingredient unless staff are certain that there are no traces of that ingredient in the product, and that all labelling is checked before being offered for consumption.

The relevant staff, e.g. kitchen staff, will be trained prior to storing, handling, preparing, cooking and/or serving food to ensure they are aware of their legal obligations. Training will be reviewed on an annual basis, or as soon as there are any revisions to related guidance or legislation.

Food labelling

Food goods classed as 'pre-packed for direct sale' (PPDS) will clearly display the following information on the packaging:

- The name of the food
- The full ingredients list, with ingredients that are allergens emphasised, e.g. in bold, italics, or a different colour

The school will ensure that allergen traceability information is readily available. Allergens will be tracked using the following method:

- Allergen information will be obtained from the supplier and recorded, upon delivery, in a food allergen log stored in the kitchen
- Allergen tracking will continue throughout the school's handling of allergen-containing food goods, including during storage, preparation, handling, cooking and serving
- The food allergen log will be monitored for completeness on a weekly basis by the kitchen manager
- Incidents of incorrect practices and incorrect and/or incomplete packaging will be recorded in an incident log and managed by the kitchen manager

Declared allergens

The following allergens will be declared and listed on all PPDS foods in a clearly legible format:

- Cereals containing gluten and wheat, e.g. spelt, rye and barley
- Crustaceans, e.g. crabs, prawns, lobsters

- Nuts, including almonds, hazelnuts, walnuts, cashews, pecan nuts, brazil nuts and pistachio nuts
- Celery
- Eggs
- Fish
- Peanuts
- Soybeans
- Milk
- Mustard
- Sesame seeds
- Sulphur dioxide and sulphites at concentrations of more than 10mg/kg or 10mg/L in terms of total sulphur dioxide
- Lupin
- Molluscs, e.g. mussels, oysters, squid, snails

The above list will apply to foods prepared on site, e.g. sandwiches, salad pots and cakes, that have been pre-packed prior to them being offered for consumption.

Kitchen staff will be vigilant when ensuring that all PPDS foods have the correct labelling in a clearly legible format, and that this is either printed on the packaging itself or on an attached label. Food goods with incorrect or incomplete labelling will be removed from the product line, disposed of safely and no longer offered for consumption.

Any abnormalities in labelling will be reported to the kitchen manager immediately, who will then contact the relevant supplier where necessary.

The kitchen manager will be responsible for monitoring food ingredients, packaging and labelling on a weekly basis and will contact the supplier immediately in the event of any anomalies.

Changes to ingredients and food packaging

The school will ensure that communication with suppliers is robust and any changes to ingredients and/or food packaging are clearly communicated to kitchen staff and other relevant members of staff.

Following any changes to ingredients and/or food packaging, all associated documentation will be reviewed and updated as soon as possible.

6. Animal allergies

Pupils with known allergies to specific animals will have restricted access to those that may trigger a response.

In the event of an animal on the school site or visiting sites. Staff members will be made aware of any pupils to whom this may pose a risk and will be responsible for ensuring that the pupil does not come into contact with the specified allergen.

The school will ensure that any pupil or staff member who comes into contact with the animal washes their hands thoroughly to minimise the risk of the allergen spreading.

7. Seasonal allergies

The term 'seasonal allergies' refers to common outdoor allergies, including hay fever and insect bites.

Precautions regarding the prevention of seasonal allergies include ensuring that grass within the school premises is not mown whilst children are outside.

Children with severe seasonal allergies will be provided with an indoor supervised space to spend their break and lunchtimes in, avoiding contact with outside allergens.

Children will be encouraged to wash their hands after playing outside.

Staff members will be diligent in the management of wasp, bee and ant nests on school grounds and in the school's nearby proximity, reporting any concerns to the site manager.

The site manager is responsible for ensuring the appropriate removal of wasp, bee and ant nests on and around the school premises.

Where a child with a known allergy is stung or bitten by an insect, medical attention will be given immediately.

8. Adrenaline auto-injectors (AAIs)

Children who suffer from severe allergic reactions may be prescribed an AAI for use in the event of an emergency.

Under the Human Medicines (Amendment) Regulations 2017 the school is able to purchase AAI devices without a prescription, for emergency use on children who are at risk of anaphylaxis, but whose device is not available or is not working.

If required the school will purchase spare AAIs from a pharmaceutical supplier, such as the local pharmacy.

The school will submit a request, signed by the headteacher, to the pharmaceutical supplier when purchasing AAIs, which outlines:

- The name of the school.
- The purposes for which the product is required.
- The total quantity required.

Where possible, the school will hold one brand of AAI to avoid confusion with administration and training; however, subject to the brands children are prescribed, the school may decide to purchase multiple brands.

The school will purchase AAI in accordance with age-based criteria, relevant to the age of children at risk of anaphylaxis, to ensure the correct dosage requirements are adhered to. These are as follows:

- For children under age 6 0.15 milligrams of adrenaline
- For children aged 6 – 12 0.3 milligrams of adrenaline

Spare AAI are stored as part of an emergency anaphylaxis kit, which includes the following:

- One or more AAI
- Instructions on how to use the device(s)
- Instructions on the storage of the device(s)
- Manufacturer's information
- A checklist of injectors, identified by the batch number and expiry date, alongside records of monthly checks
- A note of the arrangements for replacing the injectors
- A list of children to whom the AAI can be administered
- An administration records

Spare AAI are not located more than five minutes away from where they may be required. The emergency anaphylaxis kit(s) can be found at the following locations:

- The staffroom – First Aid cupboard

All staff have access to AAI devices, but these are out of reach and inaccessible to children – AAI devices are not locked away where access is restricted.

All spare AAI devices will be clearly labelled to avoid confusion with any device prescribed to a named child.

In line with manufacturer's guidelines, all AAI devices are stored at room temperature in line with manufacturer's guidelines, protected from direct sunlight and extreme temperature.

The following staff members are responsible for AAI.

- Mrs N Butler
- Mrs S Gething

Spare AAI devices are present and have not expired. Replacement AAI are obtained when expiry dates are approaching.

Any used or expired AAI are disposed of after use in accordance with manufacturer's instructions.

Used AAI may also be given to paramedics upon arrival, in the event of a severe allergic reaction, in accordance with this policy.

A sharps bin is utilised where used or expired AAI are disposed of on the school premises.

Where any AAI are used, the following information will be recorded on the AAI Record:

- Where and when the reaction took place
- How much medication was given and by whom

9. Access to spare AAI

A spare AAI can be administered as a substitute for a child's own prescribed AAI, if this cannot be administered correctly, without delay.

Spare AAI's are only accessible to children for whom medical authorisation and written parental consent has been provided – this includes children at risk of anaphylaxis who have been provided with a medical plan confirming their risk, but who have not been prescribed an AAI.

Consent will be obtained as part of the introduction or development of a child's IHP.

If consent has been given to administer a spare AAI to a child, this will be recorded in their IHP.

The school uses a register of children (Register of AAI's) to whom spare AAI's can be administered – this includes the following:

- Name of child
- Class
- Known allergens
- Risk factors for anaphylaxis
- Whether medical authorisation has been received
- Whether written parental consent has been received
- Dosage requirements

Parents are required to provide consent on an annual basis to ensure the register remains up-to-date.

Parents can withdraw their consent at any time. To do so, they must write to the headteacher.

Mrs A Lynch updates the medical conditions register relevant to any changes.

Copies of the register are held in each classroom, which are accessible to all staff members.

10. School trips

The headteacher will ensure a risk assessment is conducted for each school trip to address children with known allergies attending. All activities on the school trip will be risk assessed to see if they pose a threat to any children with allergies and alternative activities will be planned where necessary to ensure the children are included.

The school will speak to the parents of children with allergies where appropriate to ensure their co-operation with any special arrangements required for the trip.

A designated adult will be available to support the child at all times during a school trip.

If the child has been prescribed an AAI, at least one adult trained in administering the device will attend the trip. The child's medication will be taken on the trip and stored securely – if the child does not bring their medication, they will not be allowed to attend the trip.

A member of staff is assigned responsibility for ensuring that the child's medication is carried at all times throughout the trip.

Two AAIs will be taken on the trip and will be easily accessible at all times.

Where the venue or site being visited cannot assure appropriate food can be provided to cater for children's allergies, the child will take their own food or the school will provide a suitable packed lunch.

11. Medical attention and required support

Once a child's allergies have been identified, a meeting will be set up between the child's parents, the relevant classroom teacher, the school nurse and any other relevant staff members, in which the child's allergies will be discussed and a plan of appropriate action/support will be developed.

All medical attention, including that in relation to administering medication, will be conducted in accordance with the Supporting Children with Medical Conditions Policy.

Parents will provide the school with any necessary medication, ensuring that this is clearly labelled with the child's name, class, expiration date and instructions for administering it.

Children will not be able to attend school or educational visits without any life-saving medication that they may have, such as AAIs.

All members of staff involved with a child with a known allergy are aware of the location of emergency medication and the necessary action to take in the event of an allergic reaction.

Any specified support which the child may require is outlined in their IHP.

All staff members providing support to a child with a known medical condition, including those in relation to allergens, will be familiar with the child's IHP.

Mrs N Butler is responsible for working alongside relevant staff members, parents and school nurse in order to develop IHPs for children with allergies, ensuring that any necessary support is provided and the required documentation is completed, including risk assessments being undertaken.

Mrs N Butler has overall responsibility for ensuring that IHPs are implemented, monitored and communicated to the relevant members of the school community.

12. Staff training

Designated first aid trained staff members will be trained in how to administer an AAI, and the sequence of events to follow when doing so.

In accordance with the Supporting Children with Medical Conditions Policy, staff members will receive appropriate training and support relevant to their level of responsibility, in order to assist children with managing their allergies.

The relevant staff, e.g. kitchen staff, will be trained on how to identify and monitor the correct food labelling and how to manage the removal and disposal of PPDS foods that do not meet the requirements set out in Natasha's Law.

The relevant members of staff will be trained on how to consistently and accurately trace allergen-containing food routes through the school, from supplier delivery to consumption. Designated staff members will be taught to:

- Recognise the range of signs and symptoms of severe allergic reactions.
- Respond appropriately to a request for help from another member of staff.
- Recognise when emergency action is necessary.
- Administer AAIs according to the manufacturer's instructions.
- Make appropriate records of allergic reactions.

All staff members will:

- Be trained to recognise the range of signs and symptoms of an allergic reaction.
- Understand how quickly anaphylaxis can progress to a life-threatening reaction, and that anaphylaxis can occur with prior mild to moderate symptoms.
- Understand that AAIs should be administered without delay as soon as anaphylaxis occurs.
- Understand how to check if a child is on the Register of AAIs.
- Understand how to access AAIs.
- Understand who the designated members of staff are, and how to access their help.
- Understand that it may be necessary for staff members other than designated staff members to administer AAIs, e.g. in the event of a delay in response from the designated staff members, or a life-threatening situation.
- Be aware of how to administer an AAI should it be necessary.
- Be aware of the provisions of this policy.

13. Mild to moderate allergic reaction

Mild to moderate symptoms of an allergic reaction include the following:

- Swollen lips, face or eyes
- Itchy/tingling mouth
- Hives or itchy skin rash
- Abdominal pain or vomiting
- Sudden change in behaviour

If any of the above symptoms occur in a child, the nearest adult will stay with the child and call for help from the designated staff members able to administer AAIs.

The child's prescribed AAI will be administered by the designated staff member. Spare AAIs will only be administered where appropriate consent has been received.

Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI.

If necessary, other staff members may assist the designated staff members with administering AAIs.

The child's parents will be contacted immediately if a child suffers a mild to moderate allergic reaction, and if an AAI has been administered.

In the event that a child without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

For mild to moderate allergy symptoms, the AAI will usually be sufficient for the reaction; however, the child will be monitored closely to ensure the reaction does not progress into anaphylaxis.

Should the reaction progress into anaphylaxis, the school will act in accordance with this policy.

The school nurse will refer any child who has been administered an AAI to the hospital for further monitoring.

The headteacher will ensure that any designated staff member required to administer an AAI has appropriate cover in place, e.g. if they were teaching a class at the time of the reaction.

14. Managing anaphylaxis

In the event of anaphylaxis, the nearest adult will lay the child flat on the floor and try to ensure the child suffering an allergic reaction remains as still as possible; if the child is feeling weak, dizzy, appears pale and is sweating their legs will be raised. A designated staff member will be called for help and the emergency services contacted immediately. The designated staff member will administer an AAI to the child. Spare AAIs will only be administered if appropriate consent has been received.

Where there is any delay in contacting designated staff members, the nearest staff member will administer the AAI.

If necessary, other staff members may assist the designated staff members with administering AAIs.

A member of staff will stay with the child until the emergency services arrive – the child will remain lying flat and still. If the child's condition deteriorates after initially contacting the emergency services, a second call will be made to ensure an ambulance has been dispatched.

The headteacher will be contacted immediately, as well as a suitably trained individual, such as a first aider.

If the child stops breathing, a suitably trained member of staff will administer CPR.

If there is no improvement after five minutes, a further dose of adrenaline will be administered using another AAI, if available.

In the event that a child without a prescribed AAI, or who has not been medically diagnosed as being at risk of anaphylaxis, suffers an allergic reaction, a designated staff member will contact the emergency services and seek advice as to whether an AAI should be administered. An AAI will not be administered in these situations without contacting the emergency services.

A designated staff member will contact the child's parents as soon as is possible.

Upon arrival of the emergency services, the following information will be provided:

- Any known allergens the child has
- The possible causes of the reaction, e.g. certain food
- The time the AAI was administered – including the time of the second dose, if this was administered

Any used AAI's will be given to paramedics.

Staff members will ensure that the child is given plenty of space, moving other children to a different room where necessary.

Staff members will remain calm, ensuring that the child feels comfortable and is appropriately supported.

A member of staff will accompany the child to hospital in the absence of their parents.

If a child is taken to hospital by car, two members of staff will accompany them.

Following the occurrence of an allergic reaction, the SLT, in conjunction with the school nurse, will review the adequacy of the school's response and will consider the need for any additional support, training or other corrective action.

15. Monitoring and review

The headteacher is responsible for reviewing this policy annually.

The effectiveness of this policy will be monitored and evaluated by all members of staff. Any concerns will be reported to the headteacher immediately.

Following each occurrence of an allergic reaction, this policy and children's IHPs will be updated and amended as necessary.

Allergy declaration form

Name of child:			
Date of birth:		Year group:	
Name of GP:			
Address of GP:			

Nature of allergy:	
Severity of allergy:	
Symptoms of an adverse reaction:	
Details of required medical attention:	
Instructions for administering medication:	
Control measures to avoid an adverse reaction:	

Spare AAls

I understand that the school may purchase spare AAls to be used in the event of an emergency allergic reaction. I also understand that, in the event of my child's prescribed AAI not working, it may be necessary for the school to administer a spare AAI, but this is only possible with medical authorisation and my written consent.

In light of the above, I provide consent for the school to administer a spare AAI to my child.
