

Name.....

Date..... School.....

Class..... Score.....

1	$87 + 21 =$	<input type="text"/>	<input type="checkbox"/> 1 mark

2	$46 \times 29 =$	<input type="text"/>	<input type="checkbox"/> 2 marks

3

$$893 + 30 =$$

1 mark

4

$$93.1 \times 100 =$$

1 mark

5

$$2,074 \div 7 =$$

1 mark

Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1. $87 + 21 = \mathbf{108}$ (M)

2. $46 \times 29 = \mathbf{1,334}$ (W)

3. $893 + 30 = \mathbf{923}$ (M)

4. $93.1 \times 100 = \mathbf{9,310}$ (M)

5. $2,074 \div 7 = \mathbf{296 \text{ r } 2}$ or $\mathbf{296 \frac{2}{7}}$ (W)
