

## Home Learning - Reception

Where will your Space adventure take you??

<p>Rocket on a string - Make a simple cardboard tube rocket with a deflated balloon taped to it, thread a string through the tube and ask two people to hold either end. Then ask an adult to blow up the balloon and release it. How far will your rocket travel?</p>	<p>Go outside when it is dark, or look out the window and talk about what you can see. Can you count the stars? Can you find the moon? Does the sky change from one night to the next?</p>	<p>Plan a tea party on the moon for the aliens. You could draw pictures of the food you want at the party. Think about what kind of food an alien might like - star biscuits, rocket jelly or moon cheese balls, the possibilities are endless!</p>
<p>10 little aliens went flying one night until 6 flew away - how many are left? You could draw a picture or use your fingers to help you work out the answer!</p>	<p>Ask a grown-up or friend to sing '10 Little Men in a Flying Saucer' with you. You could use your fingers to be the men in the flying saucer and put one down when you sing, "one man flew away."</p>	<p>How many words can you think of that rhyme with 'space'? See if you can write down 3.</p>
<p>Create a vehicle that you could use to travel into space. What would it look like? You could create a rocket using cardboard tubes, a spacecraft using old boxes or you could design a different type of vehicle to get you there!</p>	<p>Design your own planet. Draw a picture of it and think about what shape and colours it might be. What would you call it? Use your phonics sounds to write the name of the planet. Ask a grownup to help you write some adjectives to describe your planet.</p>	<p>Practise writing your name forming all the letters correctly. Can you do your surname as well?</p>
