Activity

Your outdoor challenge is to design and build a board game for up to six people to play.

You can create your own board game or recreate one you already know.

You could work on your own or with others in teams.

What materials can you find which work best?
Large or small?

Create some clear instructions for players of your game and try it out!

Do you need to make an adjustment? What other games could you create?

What could you use?

A range of small and large materials e.g. recycling, scrap construction, materials, natural items, and other bits 'n' bobs!

General Learning Outcomes

Loose parts play is a great way for young people to be creative and imaginative using found and natural materials in their environment. By working with found materials, they can learn about issues such as recycling, re-using and adapt objects for different functions and purposes.

By working together young people can learn to communicate their ideas, to collaborate and problem solve with others.
