

## British Science Week

(14<sup>th</sup>-18<sup>th</sup> March)

Broadbent Fold will be celebrating British Science Week this year.

The theme this year is 'growth'. This can include many things like: how is the world struggling with growing populations? Which conditions are needed to make sunflowers grow tall? And which scientific discoveries have led to growth and advances for the better?

We will welcome 'The Science Boffins' into school during the week. They will launch a really fun assembly- making elephant toothpaste, conducting an experiment to see which pupils are 'naughty' or 'nice' with a test of morals and finishing with a live demonstration of Bernoulli's air flow principles.

### Science Boffins

On Tuesday 15<sup>th</sup> March, Years 1 to 6 will have a fun workshop with 'The Science Boffins'. We will end the day with a fabulous rocket launch.

Each class will plant something to watch how it grows.

Mary Anning

Albert Einstein

Friday 18<sup>th</sup> March

Katherine Johnson

We will host a Science Fair- more details to be sent home.

DRESS UP DAY- on 18<sup>th</sup> March you can come to school dressed up as a real-life scientist. This could be anyone from David Attenborough, Mae C Jemison, Brian Cox, Marie Curie, Jane Goodall, Ada Lovelace.... there are endless possibilities. We can't wait to see who you will be.

### Science week ideas for home

- Grow your own plant from a seed- what does it need to survive?
- Look at the life cycle of an animal- draw or make a model
- Find out about a famous inventor who has made big changes to our lives
- Make a poster- how can we grow a more planet-friendly community?
