Science and the outside environment	<p>Egg drop parachute experiment. Please ensure you are <u>supervised by an adult</u>.</p> <p>Take photos and send them to admin@broadbentfold.tameside.sch.uk and I can put the on the class blog.</p> <p>Objective: Create a package to contain and successfully land a raw egg without breaking it when fallen from a height to the ground. You will learn about the different forces acting on your package.</p> <p>You will need: 1 raw egg, masking or cellotaph, a plastic bag or plastic bin bag, 3metres of string, 2 sheets of newspaper, 1 cereal box and scissors (please do not walk around with these.)</p> <ol style="list-style-type: none">1. Design your parachute on an A4 piece of paper.2. Create your parachute using only the materials given above.3. Once you have made your final parachute product, test your parachute by dropping it from a height. Please be supervised by an adult and make sure the landing space is clear.4. Check your egg? Is it broken or did it survive? <p>Results/Conclusion</p> <ol style="list-style-type: none">1. Why do you think you egg broke or survived?2. If your egg broke, what force acting on your package do you need more of? If you were going to do the experiment again, how would you make your package slow down?3. Label your design with the forces acting on your package.
